Unit：mm

Item No.	L	W	H
RPS-TW3/P17F	55	12	6

Features

- SMD module is a kind of more economic light source products, each module is made of high quality SMD2835 LED; Replace the old 3528 modules with higher brightness, but the price is the same as the 3528 module.

- Unique circuit design ensured the stability. The PCB board is made of epoxy glass fiber wiki plate, the cooling performance is good, has the anti-static, anti-aging, etc

- Unique optical systems, the light is uniform and soft

- DC12V constant voltage driver, energy conservation and environmental protection
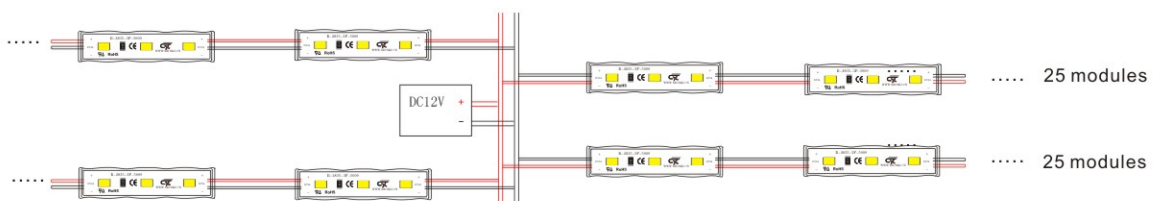

- IP level: IP65

Application

- Billboards, blister word, flat word;

- Fine words, large advertising logo;

- Various models light box of high-grade entertainment club;

- Hotel buildings, indoor decorate adornment

Parameters

Item No.	PCB	Wattage	Voltage	LEDS/m	Lumen Output/m	View Angle	IP Rate	Warranty	Working environment	Package
RPS-TW3/P17F	FR-4	0.54W	DC12V	3pcs 2835	38.01lm	120°	Ip65	2years	−20~+65℃	350g/bag

Connection

..... 25 modules

..... 25 modules

Note: every 50 PCS sets for the primary circuit, more than 50 PCS sets should be connected to the main line.
